Johor, October 2025.

Heart attack.
GL delayed by insurance.

I advised the patient to proceed immediately — but he was worried about a bill he couldn't afford. He refused.

This led to more cardiac injury.

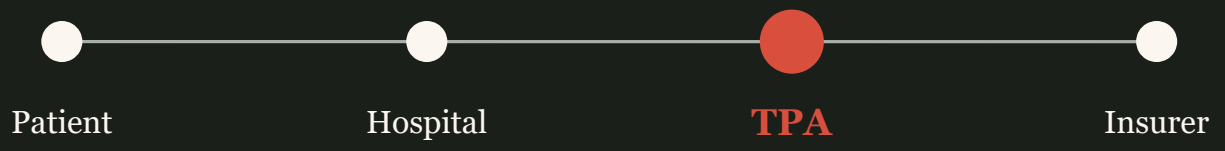
Cardiologist, Johor

CodeBlue Malaysia, 'Deny, Delay, Revoke' — Alifah Zainuddin, 15 Oct 2025

Who let this happen?

The TPA.

A Third Party Administrator — the invisible office between you, the hospital, and your insurer.



- Verifies your policy.
- Validates your diagnosis.
- Issues — or delays — your Guarantee Letter.

Manual. Human. Same way since 1999.

Our answer.

ClaimIQ.

AI-powered claims intelligence,

built for Malaysian TPA workflows.

Not France. Not the US. Built for Guarantee Letters, ICD codes, PDPA, and real hospital workflows in this country.

Decisions in seconds.

Not hours.

How it works.

A claim comes in

APPROVED	**REFERRED**	**DENIED**
GL issued instantly	*Human review, AI-assisted*	*With cited policy reason*

Every decision → audit trail · EOB · clinic notified

AI for the volume. *Humans for the judgment calls.*

What's inside.

Six things, all working together.

- **Policy rules** — *Coverage rules enforced automatically — no missed deadlines, no inconsistent decisions.*
- **Cross-checks** — *Invoice × diagnosis × identity. If anything doesn't match, we catch it.*
- **AI that reads** — *Real-time RAG over your actual policy docs. Not guessing — citing your own rules.*
- **Fraud graph** — *Maps relationships across providers and patients. Catches network-level fraud.*
- **Bilingual EOB** — *Explanation of Benefits, English & Bahasa, in under 3 seconds.*
- **PDPA audit trail** — *Every decision, every action, hashed and replayable.*

The business case.

Pays for itself.

ADJUDICATION DECISION

REFERRED AI: DENIED Conf: 92%

The diagnosis of Impaired Fasting Glucose (ICD-10 R73.0) is clinically supported by the patient's fasting glucose of 108 mg/dL, which exceeds the reference range of 70–99 mg/dL, and the chief complaint of mild persistent fatigue aligns with early metabolic dysregulation. The billed amount of RM 98.00 exceeds the Malaysian TPA outpatient GP consultation limit of RM 35–80 per visit, indicating an overcharge relative to the fee schedule for a routine pre-diabetes review and lifestyle counseling. The Gemini-parsed evidence document failed to parse (error: "No module named 'google'"), providing no usable data; consequently it neither supports nor contradicts the clinical description, and no specific lab or invoice values can be quoted from it. Based on the policy limit and clinical necessity, the claim is denied for exceeding the allowable outpatient consultation fee, with the full billed amount of RM 98.00 not payable.

Denial Risk: 28% (LOW)

Outpatient GP consultation limit RM 35-80 per visit (Malaysian TPA principles).
Fasting glucose 108 mg/dL (above reference range 70–99 mg/dL) indicates impaired fasting glucose (ICD-10 R73.0).

Ask GLM about this claim

Hi! Ask me anything about this claim.

Why was this decision made?

The claim was referred (effectively denied) because the billed amount of RM 98.00 exceeds the Malaysian TPA outpatient GP consultation limit of RM 35-80 per visit, indicating an overcharge for a routine pre-diabetes review. Additionally, fraud screening flagged a critical issue: the service date (2026-04-01) is in the future relative to today's date, which raises suspicion of temporal impossibility and potential fraudulent billing.

Is the service date of 2026-04-01 correct, or should it be revised to a past date?

The service date of 2026-04-01 is not correct; it appears to be a future date relative to today's date (2025-08-27). The claim should be revised to a past date that reflects the actual visit, or the claim should be placed on hold until the correct date is verified and supported by documentation.

What is the actual date of service according to the patient's records or the clinic's appointment log?

Can you provide a copy of the appointment slip or any other proof that shows the visit occurred on a past date?

Should we temporarily suspend processing of this claim until the date discrepancy is resolved?
